Notes:

1. Only a portion of the costs of the Swaley Drain work as proposed will be distributed in proportion to the hectares/acres shown in this Appendix. The costs to be levied to specific parties as described elsewhere in this Preliminary Report would be first determined and then the balance only would be distributed in proportion to the areas shown here.
2. Significant affected hectares (acres) that are wooded and/or inundated would be reduced when used in a cost distribution/assessment and hectares (acres) of roads and built-up areas may be increased when used in a cost distribution/assessment.
3. These adjustments have been made, as shown, to some parcels when converting from gross hectares to net acres.
4. Adjustments to other parcels may be made at the time of a Final Report.
